

Event Manager and Script Engine

Pre-Certification Exercises

2.24.2015

Exercise #1 – Integrate with your IDE

- Get the SVN Repository URL

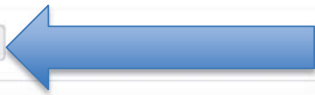

Assembla > My Start > MasterScripts-Services

MasterScripts-Services

Team Stream SVN

Source Commits Compare Merge Requests Instructions

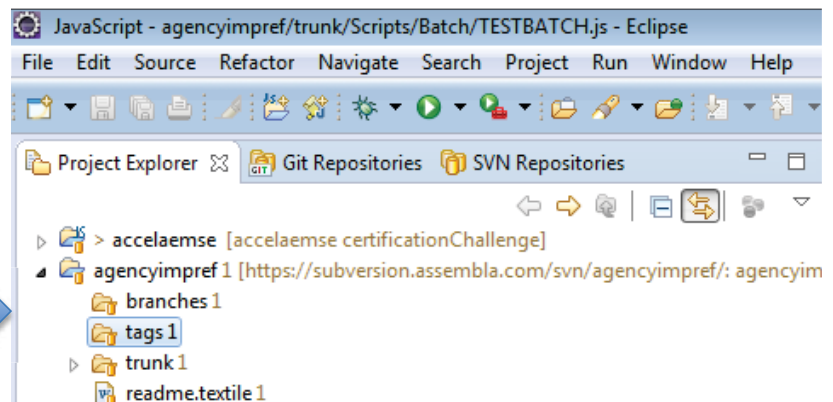

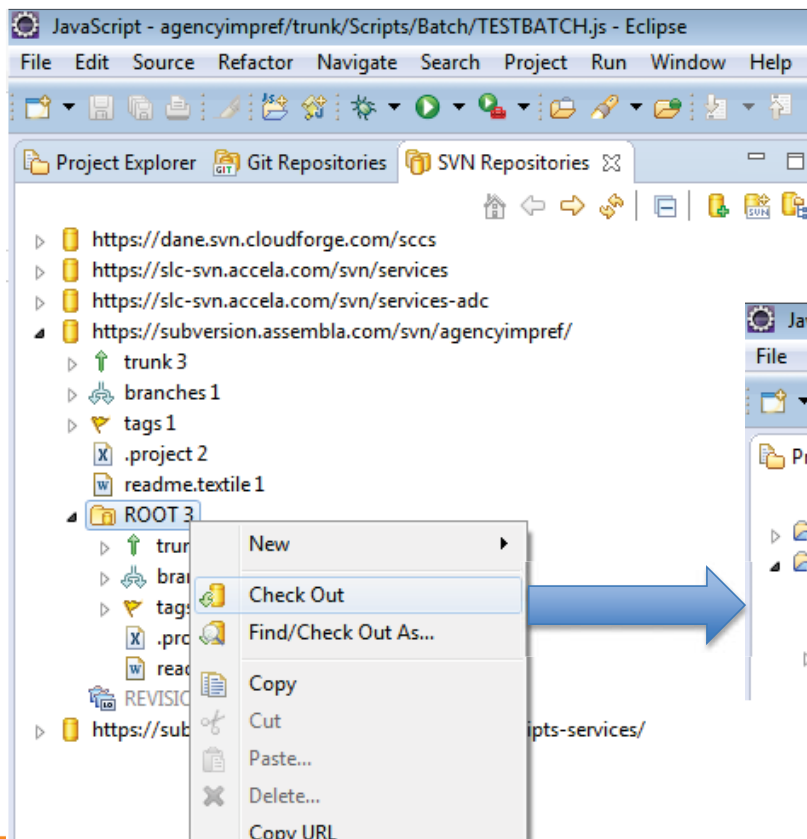

masterscripts-services Checkout URL: <https://subversion.assembla.com/svn/masterscripts-service> 

NAME	DATE	COMMIT MESSAGE
branches	2015-02-17	[Dane Quatacker]
tags	2015-02-17	[Dane Quatacker] Beta Release of Master Scripts
trunk	2015-02-17	[Dane Quatacker] Correct parameter in ScheduleInspect
.project	2015-02-17	[Dane Quatacker]
readme.textile	2015-02-17	[Dane Quatacker] Added repository Readme

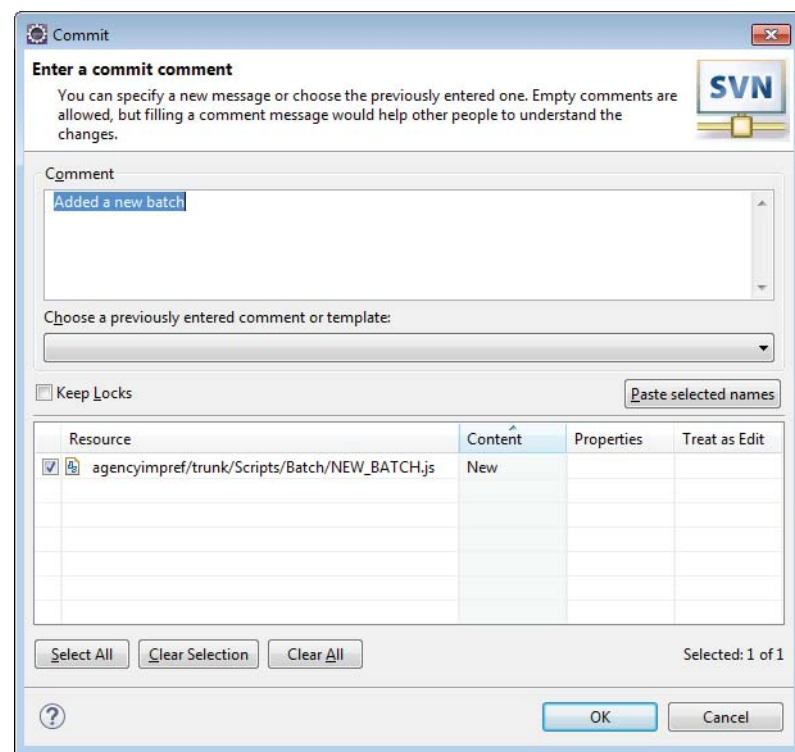

Exercise #1 – Integrate with your IDE continued

- Right click the root of the SVN Repository and check it out
- Project is now available in Project Explorer for use

Exercise #2 – Create a New Script and Commit

- In Eclipse Create a new Script in your workspace
 - Script name should be all uppercase
- Add a new function
 - Don't forget code standards!
 - Don't forget repository structure!
- Commit the changes to the repository

Exercise #3 – Link it to Accela!

- In Accela Classic go to Admin > Standard Choices
- Add the EMSEToolConfig standard choice
- Complete the required information (See Accela Automation 7.3.3.3 Release Notes.pdf for additional info)
- **Note:** Used http:// for repository URL not https

The screenshot shows the 'Standard Choices Item - Edit' form in the Accela Classic Admin interface. The form is for the item 'EMSEToolConfig'. The 'Description' field is empty. The 'Status' is set to 'Enable' and the 'Type' is set to 'System Switch'. Below the form is a table of 'Standard Choices Value' and 'Value Desc' with an 'Active' column and a 'Delete' button for each row.

Standard Choices Item - Edit

Use this form to set up a Standard Choices Item.

Standard Choices Item Name: EMSEToolConfig

Description: (250 char max)

Status: ☒ Enable ☐ Disable

Type: ☒ System Switch ☐ Shared drop-down ☐ EMSE ☐ Business Configuration

Standard Choices Value	Value Desc	Active	
agency_repo_password	password	<input checked="" type="checkbox"/>	Delete
agency_repo_username	quatacker	<input checked="" type="checkbox"/>	Delete
agency_url_svn	http://subversion.assembla.com/svn/agencyimpref/trunk	<input checked="" type="checkbox"/>	Delete
master_repo_password	password	<input checked="" type="checkbox"/>	Delete
master_repo_username	quatacker	<input checked="" type="checkbox"/>	Delete
master_url_svn	http://subversion.assembla.com/svn/services-emse/trunk	<input checked="" type="checkbox"/>	Delete

Update Add Cancel

Exercise #4 – Import New Script into Accela

- Go to Accela Automation
- Add the EMSE Tool portlet to the console if it doesn't exist already
- Locate the Script in the repository
- Deploy to Accela Automation
